Branch name pattern *

main

Protect matching branches

☒ Require a pull request before merging
When enabled, all commits must be made to a non-protected branch and submitted via a pull request before they can be merged into a branch that matches this rule.

☒ Require approvals
When enabled, pull requests targeting a matching branch require a number of approvals and no changes requested before they can be merged.
Required number of approvals before merging: 1

☐ Dismiss stale pull request approvals when new commits are pushed
New reviewable commits pushed to a matching branch will dismiss pull request review approvals.

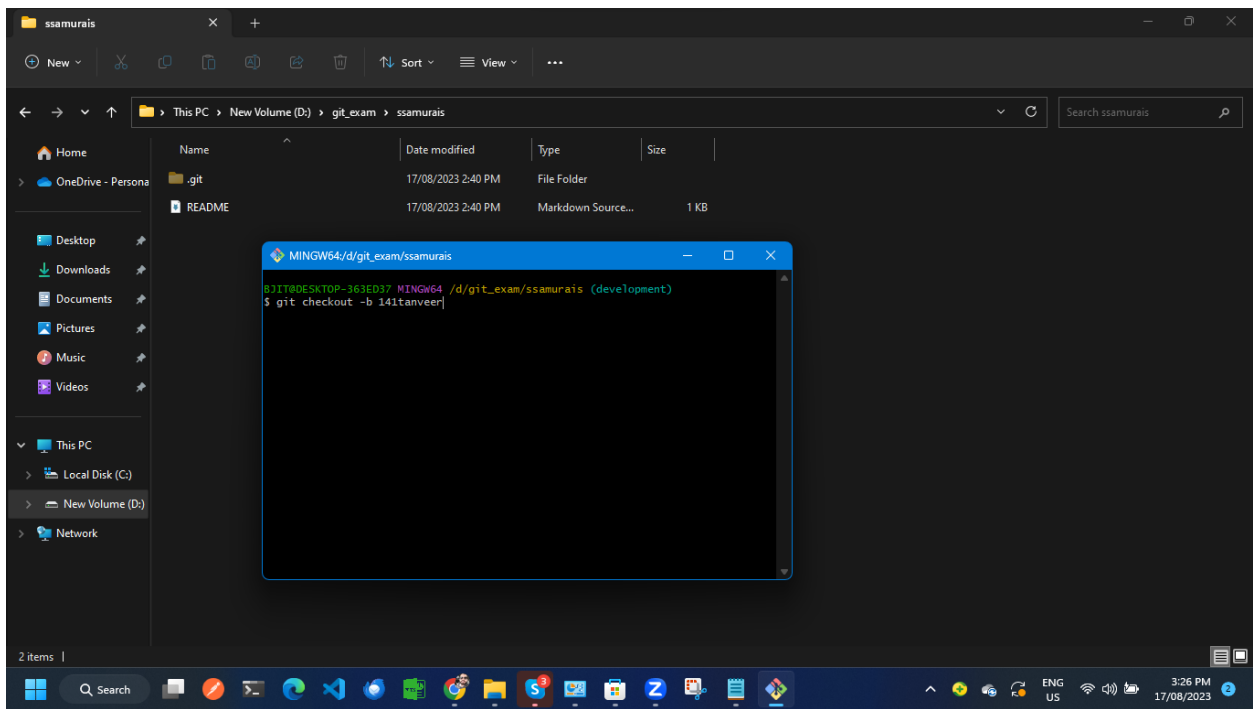

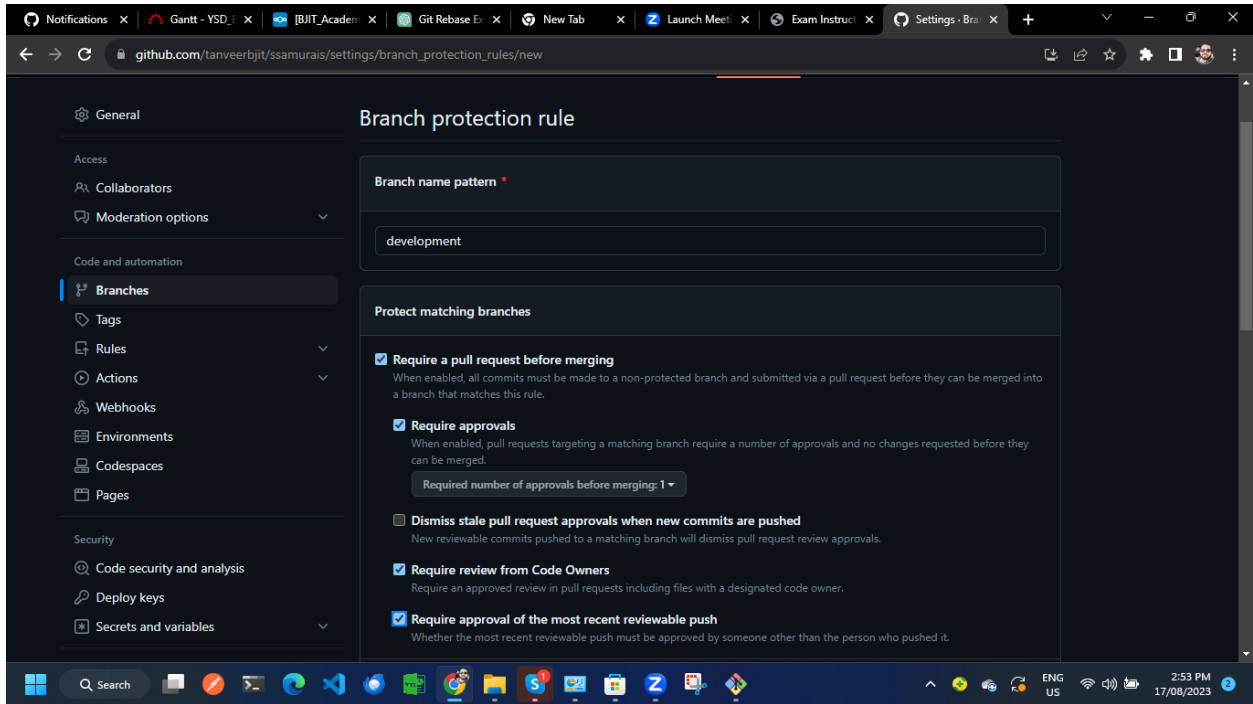

☒ Require review from Code Owners
Require an approved review in pull requests including files with a designated code owner.

☒ Require approval of the most recent reviewable push
Whether the most recent reviewable push must be approved by someone other than the person who pushed it.

☐ Require status checks to pass before merging
Choose which status checks must pass before a branch can be merged into a branch that matches this rule. When enabled, commits
